Support H.549/S.311: An Act Relative to Educator Diversity

For students of color to thrive in the classroom, they need to see themselves represented in their teachers and role models. As a Commonwealth, we have an opportunity to ensure we are building the next generation of diverse educators who can transform the experience of students of color by passing the Educator Diversity Act this session.

The Educator Diversity Act would accomplish the following:

- **Alternative Certification**: Establish multiple pathways to certification and provide safeguards for negative impacts of certification on candidates of color, such as diversifying the Career Vocational Technical Education educator pipeline and creating similar alternative pathways for licensure.

- **Data Diversity Dashboard**: Charging DESE to establish an Educator Diversity Data Dashboard which would disaggregate data in areas such as educator retention by race and set clear targets for the diversification of the educator pipeline.

- **Hiring & Promotional Practices, Biases, & Mandated Diversity & Inclusion Training**: Require uniformity across school districts to appoint diversity officers or teams to set the vision for DEI plans, set measurable goals, and to ensure compliance with all provisions.

- **Elevate the Voices of Diverse Educators**: Establish Educator Diversity Councils to serve as advisory councils to school committees and district leaders to address issues of diversity, equity, and inclusion in local school districts.

- **Creating an Educator Diversity Grant Fund**: Specifically targeted at programs and practices aimed at increasing educator diversity and retention. This funding is subject to annual appropriation from the legislature and requires evaluation and to ensure compliance with all provisions.
